

# Session 12: Final Test Track Challenge

## Objectives

- Final challenge - follow line around test track in shortest time while obeying static traffic signs.

## Rules

- Robocar start from stationary position at the designated start line. Time starts when robocar starts moving.
- Robocars must stay on the board. If all 4 wheels fall off the board before the first STOP sign, the attempt is disqualified.
- DO NOT stop at triangular warning/yield signs.
- Stop the robocar at any STOP sign. There will be a number of identical STOP sign placed at the end of the track. Stopping at any of the STOP sign stops the timer.
- Teams have 3 attempts to complete the challenge. The best qualified time of the three attempts is used to judge the winner.
- In the event that none of the teams managed to stop the car at any STOP sign for all three attempts, the shortest time taken to finish the entire track will be used to judge the winner.
